APPENDICES

- A1. CITY REGION HOUSING TRAJECTORY
- A2. CITY REGION EMPLOYMENT TRAJECTORY

1. INTRODUCTION

- 1.1 The Liverpool City Region Combined Authority ("LCRCA") is in the process of preparing a Spatial Development Strategy ("SDS") which is intended to set the spatial pattern for future development across the Liverpool City Region, including identifying strategic areas of growth, associated strategic infrastructure, and policies addressing health inequalities and climate change.
- 1.2 To inform the SDS, Iceni Projects ("Iceni") have been commissioned by the Liverpool City Region Combined Authority ("the CA") to prepare a strategic housing and employment land study ("SHELS"). The main purpose of the SHELS is to present key information and evidence concerning the baseline supply of land for housing and employment and its potential capacity on a City Region scale. The outputs from the SHELS will be set against the conclusions of the CA's Housing and Economic Development Needs Assessment ("HEDNA") to inform the strategic spatial strategy.
- 1.3 The National Planning Policy Framework ("the Framework") is clear that in the context of releasing Green Belt land and establishing that exceptional circumstances exist to do so, a strategic policy-making authority should be able to demonstrate that it has examined fully all other reasonable options for meetings its need. This includes making as much use as possible of suitable brownfield sites and optimising the density of development on sites.
- 1.4 The SDS therefore needs to ensure it has fully tested these options to meet development needs identified in the HEDNA before consideration is given to releasing Green Belt land as part of the strategy, if this is deemed necessary. In line with devolution regulations, only a local authority can amend its Green Belt boundary through its respective Local Plan not through the SDS. This study is a key part of the evidence base and is the starting point for understanding housing and economic land availability.

Stage One Report

- 1.5 In line with the study brief, this Stage One report focusses on understanding overall land supply and establishes a baseline position across the City Region. Iceni has collated existing housing and employment trajectories from all six authorities and worked with CA to identify and highlight existing strategic sites. This exercise is desk-based, and it should be noted that we have not sought to review the lead-in times, build out rates or deliverability of individual sites.
- 1.6 The position for both housing and employment takes account of sites which are committed with planning permission, have a resolution to grant planning permission, are allocated in existing Local Plans or are proposed for allocation in draft Local Plans at an advanced stage. In the context of

housing, it also takes into account small site contributions and a windfall allowance; and therefore, captures sites of all sizes. It is aligned to a base date of 1st April 2021.

Current Local Plan Position of City Region Authorities

1.7 The table below provides an overview of where each authority's Local Plan is currently at in preparation. This information is helpful in understanding the overall supply picture with authorities at different stages of the plan-making process. A number of authorities have a large quantity of housing come forward through the delivery of allocations whereas others, at the start of the review process, are almost entirely reliant on existing commitments.

Table 1.1 Overview of Local Plan Position

| | Plan Period | Local Plan Stage |
|------------|-------------|------------------|
| Halton | 2014-37 | Adopted |
| Knowsley | 2010-28 | No Action |
| Liverpool | 2013-33 | Adopted |
| Sefton | 2012-30 | Start of Review |
| St. Helens | 2020-37 | Adopted |
| Wirral | 2021-37 | Examination |

Structure

- 1.8 The Stage One report is structured as follows:
 - Planning Policy Context
 - Housing Land Supply
 - · Employment Land Supply; and
 - Summary

2. PLANNING POLICY CONTEXT

- 2.1 The Framework (paragraph 68) under section 5 sets out that strategic policy-making authorities should have a clear understanding of the land available in their area through the preparation of a strategic housing land availability assessment. In this context, authorities through planning policy should identify a supply of:
 - Specific, deliverable sites for years one to five of the plan period; and
 - Specific, developable sites or broad locations for growth, for years 6-10 and, where possible, for years 11-15 of the plan
- 2.2 In this context, the Framework (paragraph 74) also states that strategic policies should include a trajectory illustrating the expected rate of housing delivery over the plan period, and all plans should consider whether it is appropriate to set out the anticipated rate of development for specific sites.
- 2.3 In addition, having regard to the Framework (paragraph 121) under section 11, it is clear that authorities and other plan making bodies should take a proactive role in identifying and helping to bring forward land that may be suitable for meeting development needs; and should make effective use of land.
- 2.4 In the context of an area with policy restrictions associated with Green Belt, the Framework (paragraph 141) provides clear direction on the need to make as much use as possible of suitable brownfield sites and underutilised land as well as optimise densities before concluding that exceptional circumstances exist to justify changes to boundaries. A clear understanding of the supply position through an availability assessment is key to this process.
- 2.5 The Planning Practice Guidance ("PPG") on Housing and Economic Land Availability Assessments sets out specific guidance on how to undertake such an assessment. Stage 1 of the recommended method comprises identifying sites and broad locations for housing and employment land in order to provide a clear audit of land. This SHELS effectively forms Stage 1 of the PPG method.

3. CITY REGION HOUSING LAND SUPPLY

- 3.1 Iceni has worked with the six authorities comprising the City Region to establish a clear baseline position on housing land supply. This takes account of the existing evidence capturing committed sites (i.e. sites with planning permission), sites with a resolution to grant planning permission, sites allocated in current Local Plans or proposed for allocation in Local Plans at an advanced stage as well as a windfall allowance. This process excludes sites identified in land availability assessments without any formal planning status or broad areas with potential capacity¹.
- 3.2 The local authorities currently work independently in respect of data gathering and are at various stages of plan-making with different plan periods. As a result, the inputs and variables are not always consistent across the six areas.
- 3.3 Iceni has therefore standardised the housing trajectories to return an overview of land supply; however, in turn this has reduced the level of detail that can be presented.
- 3.4 In order to standardise the trajectories, we have collated the data, employed a consistent formatting method and standardised the categories of information (e.g. sources of supply) which allows us to present the data clearly at the City Region level. As noted in the introduction, we have not sought to amend any assumptions around the delivery of the sites this exercise is not a review of land supply.

Housing Supply over the Plan Period

3.5 On the basis of our standardised City Region trajectory, over the period from 1st April 2021 to 31st March 2041, there is a total identified land supply of around 77,225 homes (equal to an average of 3,861 homes per annum). The housing trajectory across the City Region is shown in the Figure below with clear frontloading in terms of housing delivery over the period 2021-2028 followed by a notable decline from 2029/30 onwards.

¹ This includes the "Broad Locations" identified in the Wirral Regulation 19 Local Plan. Any non-committed supply (i.e., developable sites within existing SHLAAs will be subject to a separate consideration as part of the SDS preparation process).

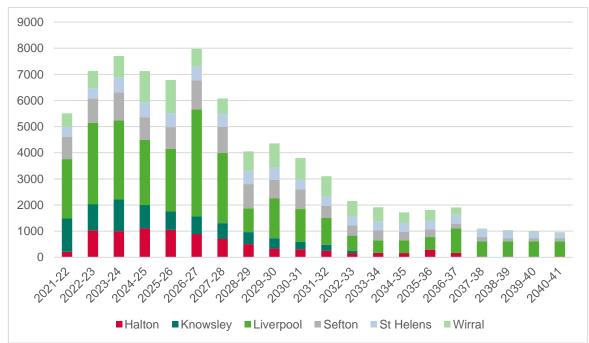

Figure 3.1: Housing Trajectory, 2021 – 2041

- 3.6 As a proportion of all committed supply, 39% is expected to come forward in the City of Liverpool with the delivery of 30,113 homes this includes supply in the City of Liverpool up to 2040/41 (which is beyond Liverpool's current plan period). Sefton and Wirral are planning for around 11,550 and 11,300 homes respectively; followed by Halton, St. Helens and Knowsley all delivering around 7,800 to 8,400 homes each.
- 3.7 Sefton and Knowsley are a number of years into their current plan period whereas Wirral has a large quantum of housing coming forward through proposed allocations. It is noted that some authorities apply non-implementation rates to sites with planning permission as well as allocated sites and final figures will be reduced marginally as a result.

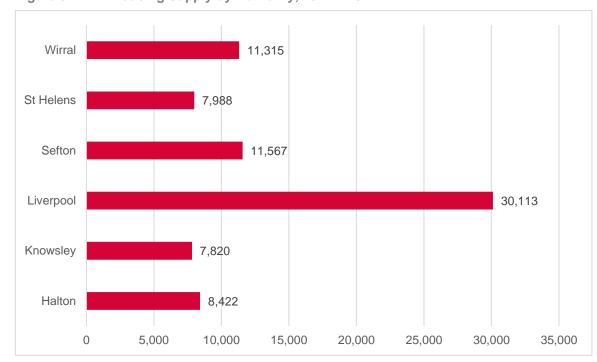

Figure 3.2: Housing Supply by Authority, 2021 – 2041

3.8 Over the five year period of 1st April 2021 to 31st March 2026, total supply in the City Region is equal to 34,259 homes or 6,851 homes per annum. In years 6-10, supply falls to 26,266 homes or around 5,253 homes per annum followed by a more notable decline to a total of around 10,699 homes (2,140 per annum) in the years 11-15 and 6,001 (1,200 per annum) in years 16-20 as the contribution from Liverpool City decreases and the existing commitments in areas without an emerging Local Plan such as Knowsley and Sefton are all fully built out.

Table 3.1 Liverpool City Region: Housing Supply by Authority, Time Periods

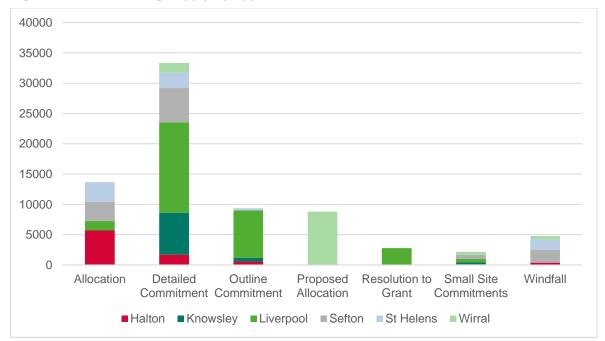

| | 2021/22 – 25/26 | 2026/27 – 30/31 | 2031/32 – 35/36 | 2036/37 – 40/41 |
|-----------|-----------------|-----------------|-----------------|-----------------|
| Halton | 4,403 | 2,738 | 1,031 | 250 |
| Knowsley | 5,080 | 2,423 | 317 | 0 |
| Liverpool | 13,301 | 10,459 | 3,061 | 3,292 |
| Sefton | 4,548 | 4,500 | 1,839 | 680 |
| St Helens | 2,458 | 2,418 | 1,733 | 1,379 |
| Wirral | 4,469 | 3,728 | 2,718 | 400 |
| LCR | 34,259 | 26,266 | 10,699 | 6,001 |

City Region Supply Categories

- 3.9 It is possible to drill into the supply categories for each local authority using the Iceni standardised trajectory. In order to do so, we have established a number of categories which best relate to each authority's identified sources. These categories are as follows:
 - Large sites with detailed planning permission (i.e. 10 homes or more inc. under construction)

- Large sites with outline planning permission
- Large sites with a resolution to grant planning permission
- Large sites allocated in adopted Local Plans
- Large sites proposed for allocation in draft Local Plans
- Small sites (i.e. less than 10 homes inc. under construction); and
- Windfall allowance
- 3.10 Drawing on the data relating to each site and applying the categories set out, the Figure below depicts the quantity of housing expected to come forward by type. Of the 77,225 homes in total, around 43% of this is on committed sites with detailed planning permission; and this rises to over half (55%) when sites with outline planning permission are included. All of the LCR authorities have made provision for a small sites and/or a windfall allowance as part of the supply accounting for around 9% of all included supply.

- 3.11 The Figure also shows that 18% of the City Region supply is identified as extant allocations. This is equal to 13,653 homes. Wirral is still working through Examination in Public of its Local Plan and therefore around 11.5% of the supply is tied up in proposed allocations.
- 3.12 It is also possible to understand the current status of the City Region's committed supply (i.e. what proportion is currently under construction) on sites with detailed planning consent. There is a total of 33,350 homes on sites with detailed consent around 40% of these sites (13,234 homes) are currently under construction. As a proportion of all supply, 17% is under construction.

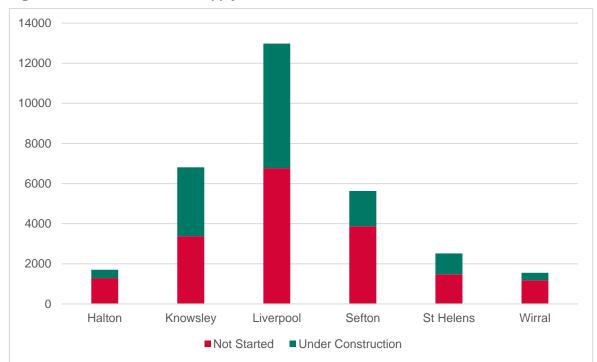

Figure 3.4: Site Status of Supply with Detailed Permission, 2021 – 2041

The Strategic Housing Sites

- 3.13 In recognition of the strategic nature of the SDS, we have sought to identify and highlight sites of strategic significance currently committed, allocated or with resolution to grant in each of the authority areas across the City Region. The strategic housing sites have been defined having regard to legislation² which is clear that large scale developments are ones which include the provision of more than 500 homes or occupies more than 10 hectares of land.
- 3.14 The figure below depicts the locations of the strategic housing sites across the City Region with a clear spread of sites across each of the six authority areas. The CA approach has been to identify "Broad Locations" which when taken together, exceed the threshold set out in legislation and hold strategic significance. On occasion, this comprises one individual site or a cluster of sites in close proximity.

² The Liverpool City Region Combined Authority (Functions and Amendment) Order 2017

Figure 3.5: Location of Strategic Housing Sites across the City Region

3.15 In detailing each Broad Location on the figure above, the table below lists the specific points with the corresponding Council reference to the specific parcel counted and the overall capacity of the site. A full list of the housing sites considered in this report can be found at Appendix A1 with the Council reference clearly stated. As is clear, a total of 34,940 homes are expected on sites defined as Broad Locations which accounts for around 46% of all supply being planned for across the City Region. It

should be noted that the capacity figures set out in the Table below cover the period 2021-41 whilst the SDS plan period is up to 2040.

| | | | |
| LCR Total | | 34,940 | |

4. CITY REGION EMPLOYMENT LAND SUPPLY

- 4.1 Iceni has also worked with the authorities to establish a baseline position on employment land supply.

 The local authorities monitor employment sites including those with planning permission and those allocated for development in existing Local Plans and proposed for allocation in draft Local Plans.

 At the time of writing, Iceni has not yet received an employment trajectory from Halton.
- 4.2 As is the case with housing, the local authorities work independently, and the methodology used to monitor employment land supply varies greatly and in some cases is limited. Iceni has standardised the data and has, as far as possible, presented as much detail as possible. The key difference between housing and employment is that there is no requirement to forecast when employment sites will begin to deliver floorspace or be completed in full. As a result, the data is not available to establish a trajectory.
- 4.3 It is however possible to establish a baseline. Set to a base date of 1st April 2021 in line with housing, the Figure below shows that across the five authority areas with data returns, there is a total of 749 hectares ("ha") of employment land in the pipeline either committed or allocated. The majority of this is identified in St Helens, Knowsley and Halton, accounting for around 69% (30%, 21% and 18% respectively) of the City Region's employment by site area.

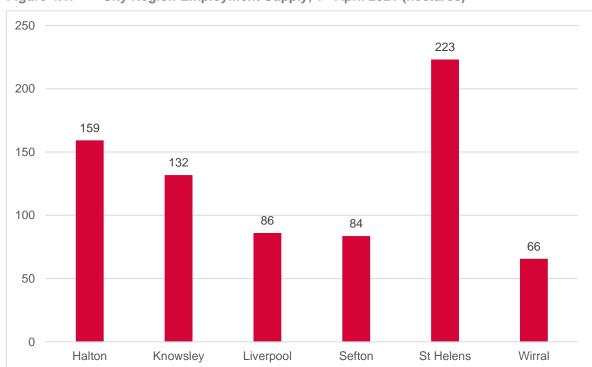

Figure 4.1: City Region Employment Supply, 1st April 2021 (hectares)

Note: due to rounding, there is a minor discrepancy between the stated total and the totals shown in the Figure

- 4.4 Drilling into the employment supply by use class, it should be noted that data is limited in certain aspects. A large proportion of supply in Liverpool and Knowsley is unspecified; however, this is principally due to the fact that these sites are allocated and could come forward for a variety of employment uses once an application is submitted and approved.
- 4.5 On the basis of all available data, of the 749 ha of employment land in the pipeline, a large proportion is planned for mixed-B class uses. Almost all employment land supply in Halton, St. Helens and Wirral is for mixed-B class use accounting for a total of 100 ha, 196 ha and 65 ha respectively. In Knowsley, 27 ha of employment land is committed for B8 distribution specifically.

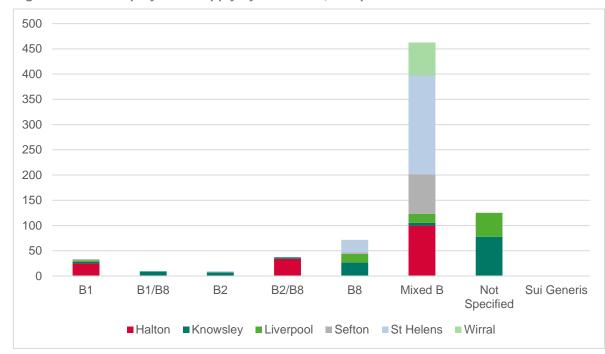

Figure 4.2: Employment Supply by Use Class, 1st April 2021

The Strategic Employment Sites

4.6 In the same context as strategic housing sites, we have sought to identify and highlight sites of strategic significance currently committed or allocated in each of the authority areas across the City Region. The strategic employment sites have been defined having regard to legislation⁶ which is clear that large scale developments are ones which include comprise buildings with a total floorspace of more than 30,000 sq. m.

⁶ The Liverpool City Region Combined Authority (Functions and Amendment) Order 2017

- 4.7 In the case of employment sites, it is however also appropriate to acknowledge that a number of sites fall outside of this threshold but remain strategically significant. As a result, the definition has been widened to take account of:
 - The Liverpool City Region HEDNA which defines large scale B8 warehousing as over 9,000 sq. m.
 - Liverpool City Region: Plan for Prosperity;
 - LCR Innovation Prospectus; and
 - Employment sites identified for strategic funding support.
- 4.8 The Figure below shows where the strategic employment sites sit across the City Region with clear coverage across the north, south, east and central areas. In line with the approach to housing sites, the CA have identified "Broad Locations" which can capture a number of sites being brought forward in close proximity.

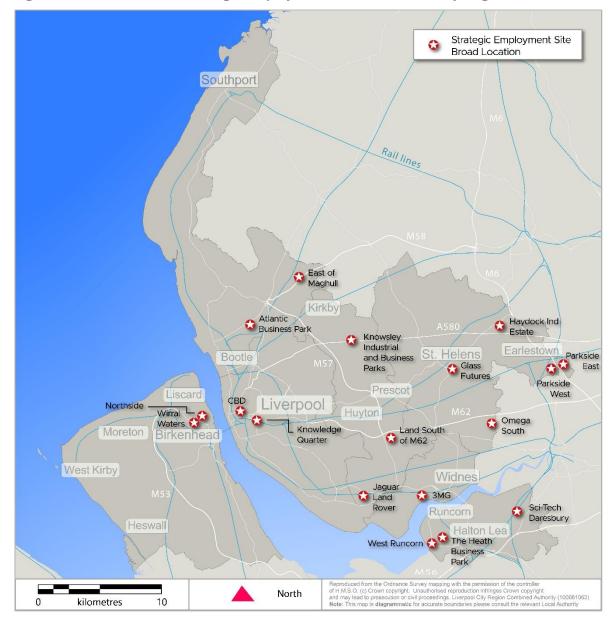

Figure 3.5: Location of Strategic Employment Sites across the City Region

4.9 In detailing each Broad Location on the figure above, the table below lists the specific points with the corresponding Council reference, where available, to the specific parcel counted and the overall capacity of the site. It should be noted that although some sites are small in terms of capacity, they have been identified in relation to the criteria set out above in paragraph 4.7. As is clear, a total of 468 ha is expected to be delivered on sites defined as Broad Locations which accounts for around 62% of all employment supply.

5. SUMMARY OF CITY REGION LAND SUPPLY

- 5.1 Drawing the land supply information together over the period 1st April 2021 to 31st March 2041, the housing and employment position is as follows:
 - In respect of housing, the standardised trajectory shows that the City Region has a housing land supply position of around 77,225 homes equal to an average of 3,861 homes per annum.
 - In respect of employment, authorities have returned data on supply. On the basis of the standardised trajectory, there is a committed employment land position of 749 ha. The majority of this is for mixed-B class provision; however, there is also a large proportion of employment land specifically for B8.
- 5.2 A full overview of both the housing and employment sites at the City Region level can be found at Appendix A1 and A2 respectively.
